

Partnering for a Connected Future

Bringing Fast, Reliable Fiber Internet to Green Valley

Who We Are: Fast-Growing, Locally Rooted

We're Wyyerd Fiber.

- Founded in 2017, Wyyerd Fiber has been connecting neighbors in AZ and CA with **fast, and reliable Fiber Internet** you can count on.
- We're more than a provider — **we're your neighbors.**
- **Flexible, hassle-free** residential and business plans
- **Local, world-class** customer service
- Recently awarded Arizona's **Fastest** and **Most Reliable** Internet Speeds!

The Power of Fiber

Why Fiber?

- **Always Fast & Reliable** – Strong upload and download speeds
- **No Buffering** – Smooth connection, even at busy times
- **Better than Cable** – Direct, dedicated connection to your home
- **Great for Family Time** – Easy video calls and streaming
- **Eco-friendly** – Uses less energy, better for the environment
- **Safe & Secure** – Light-based technology keeps your connection protected

Our Equipment & Network

- **Top Technology** – Built with the same systems trusted by leading networks
- **Strong & Reliable** – Designed for clear, consistent connections
- **Smart Router** – Our GS7 Gateway gives your home great coverage and speed

Why Wyyerd Fiber: Honestly Awesome Internet

Real Support

We answer fast, solve issues quickly, and treat you like a neighbor—not a number.

Transparent Pricing

No fine print, no gimmicks. Just fast fiber and pricing that makes sense.

Quick Service

Get clear appointment times and quick resolutions—no waiting around.

Locally Trusted

Our network is built and supported locally and trusted by the neighborhoods we serve.

4.6 ★★★★★

Our Construction Commitment to Residents

Proactive, multi-channel, and resident-focused communications

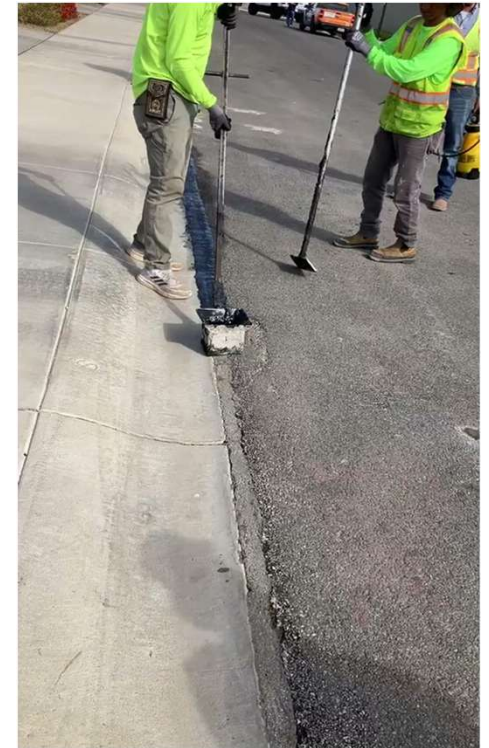

- **Online Updates**
 - Dedicated construction pages and notification sign-ups
 - www.wyerd.com/construction-az
- **Email Alerts**
 - Milestone-based updates directly to your inbox
- **Door Hangers**
 - Delivered before work begins in each area
- **Direct Mail**
 - Formal notices, restoration details, FAQs and Internet plan details
- **A-Frame Signs**
 - Posted in active construction zones
- **Local Representatives**
 - Dedicated contacts for questions and restoration follow-up

Fiber Construction in Action: Microtrenching

A faster, cleaner way to bring fiber to your neighborhood with less disruption

- Reduces construction times by up to 75%
- Minimizes the need to open roadways
- Provides seamless, minimal restoration
- Lowers the risk of striking unmarked utilities
- Limits disruption for residents and traffic
- Extends the lifespan of installed fiber by protecting it underground
- Creates a safer, cleaner environment for the community

More Than Internet: We're Your Neighbors Too

We're not just a service provider – we're part of the community

- We support municipalities, local schools, businesses, and neighborhoods.
- We host free classes, including streaming workshops, to connect and give back.
- We offer guidance for video calls and online tools.

Let's Build The Future Together

- We're ready to invest in Green Valley's infrastructure, future, and community!
 - We bring decades of proven experience, local engagement, and reliable Fiber Internet
 - Our leadership and construction teams are always ready for questions and input
 - Let's work together to connect Green Valley with **Honestly Awesome Internet**
-

ii. Technical Construction & Network Overview

Construction Capabilities

Wyverd Fiber has a proven track record across multiple construction methods, including:

- Aerial Deployments
- Underground Boring
- Microtrenching

Infrastructure Approach

Micro Conduit Deployment Strategy

- Occupy the least amount of space in the ROW
- Minimal surface and residential impact during the construction process
- Use dense micro fiber technology to enable future-proof scalability and maximize capacity with minimal conduit space

Network Architecture

- XGS-PON Fiber Internet services enables symmetrical speeds up to 10 GIG for residents and small businesses
- Fully redundant network and diverse path architecture ensures high availability and reliability

iv. Standard Boring Construction & Installation
